

For 20 years  
the CDC has allowed  
high levels of **MERCURY**  
to be administered to  
our children in the  
childhood vaccine  
program.

At the same time, an  
entire generation has  
been misdiagnosed  
and drugged to  
numbness, psychosis,  
and suicide.

Please read the stories attached and  
move your heart!

Research recently published in the International *Journal of Toxicology* shows that mid-range symptoms such as depression, personality dysfunction, inability to cope and focus are signs of mercury damage, [www.progressiveconvergence.com](http://www.progressiveconvergence.com). However, in an effort to mask their culpability the CDC, FDA, NIH, and HHS administrators deny any connection with the 20 year practices of injecting this generation directly into the arm with high levels of mercury to these symptoms of dysfunction. This denial has led our children to be misdiagnosed and prescribed drugs that have caused them to commit suicide and homicide. Our US representatives and agency administrators such as Dr. Julie Gerberding, Dr. Anthony Fauci, Dr. William Egan and others continue to make decisions that do not serve the public interest. (Case in point: Current NIH protocol is designed to test genetically engineered ANTHRAX vaccine on first and second graders.) It is in the removal and replacement of errant politicians and administrators that our concerns will have been sufficiently recognized and the future trend corrected.

<http://news.tbo.com/news/MGB9RJ7M2XD.html>

Billy Willkomm, an accomplished wrestler and University of Florida student, was prescribed Prozac at the age of 17. He didn't get better. His family found him dead — hanging from a tall ladder at the family's Gulf Shore Boulevard home in July 2002.

#### GEORGIA

<http://www.ajc.com/news/content/health/0405/03alex.html>

Alex Kim was 13 and small for his age. He was found hanging by a belt from his closet rack. His prescription of Lexapro had recently been doubled.

#### IDAHO

<http://www.antidepressantsfacts.com/Kara-12-paxil.htm>

Kara Jaye Anne Fuller-Otter was prescribed Paxil. She hanged herself at the age of 12 from a hook in her closet. "... the damn doctor wouldn't take her off it and I asked him to when we went in on the second visit. I told him I thought she was having some sort of reaction to Paxil..." — Karen's mother

#### KANSAS

<http://www.nytimes.com/2004/11/21/magazine/21TEENS.html>

Matthew Miller was 13 — a slight, fair-haired boy who wore skateboard-style clothing. He was a Cub Scout and had built the fastest pine-wood derby car in his age division. He was having difficulty in school, and a psychiatrist prescribed Zoloft for him. Seven days after beginning the samples, his mother found him dead... hanging by a belt from a laundry hook in his closet.

## MASSACHUSETTS

<http://www.geocities.com/CitizensForPharmSafetyReform>

Diane Routhier was beautiful, and happily married for 18 years, with two wonderful boys. She was prescribed Wellbutrin for gallstone problems. Six days later, after suffering through adverse effects of this drug, she shot herself.

## MINNESOTA

<http://www.woodymatters.com/story.html>

Woody died of a Zoloft-induced suicide at age 37. He was not depressed, nor did he have any history of mental illness or depression. He died after taking the drug a total of 5 weeks with the dosage being doubled shortly before his death. He was given the antidepressant from his general physician for "insomnia."

## PENNSYLVANIA

<http://www.preventsuicidenow.com/julie-woodward-suicide.html>

<http://www.phillyburbs.com/pb-dyn/news/113-04262004-289397.html>

Julie Woodward was a beautiful, intelligent, popular, studious, disciplined, ambitious, and caring girl. A diagnostic test that she took at school confirmed what many believed, that Julie was indeed suffering from depression. Two doctors at the clinic convinced her parents, Tom and Kathy, to put her on Zoloft. Six days later she hanged herself in her family's detached garage. She was only 17.

Kurt Danysh was 18 and on Prozac when he killed his father with a shotgun. He is now behind prison bars, and writes letters, hoping to reach anyone who will listen to him. He has a warning for the world.... SSRI drugs can kill.... You..... or someone else.

## SOUTH CAROLINA

[http://www.motherjones.com/news/outfront/2004/11/10\\_401.html](http://www.motherjones.com/news/outfront/2004/11/10_401.html)

<http://www.petitiononline.com/4989/petition.html>

Christopher Pittman was only 12 when he shot and killed both of his grandparents, and torched their home. He blames Zoloft for the crime that has put him behind bars for 30 years, as does his family.

## TEXAS

<http://www.click2houston.com/news/3716997/detail.html>

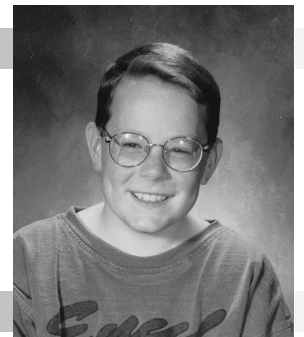

Ten year old boy shot and killed his father after his Prozac dosage was increased.

## UTAH

<http://www.worldtalkradio.com/category.asp?cid=266>

<http://www.latimes.com/features/health/la-he-ssri2feb02,1.6561761.story>

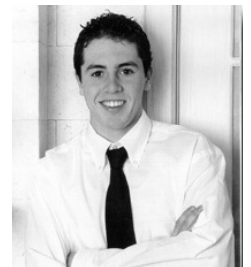

Kevin Rider's death was determined to be a suicide. He had been attempting to withdraw from Prozac when he died from a gunshot wound to his head at the age of 14. Two years later, the investigation into his death was opened as a possible homicide. The prime suspect, also aged 14 had been taking Zoloft and other SSRI antidepressants. The investigation remains open.

## VANCOUVER, BC CANADA

[http://www.thestar.com/NASApp/cs/ContentServer?pagename=thestar/Layout/Article\\_Type1&call\\_pageid=971358637177&c=Article&cid=1080256210094](http://www.thestar.com/NASApp/cs/ContentServer?pagename=thestar/Layout/Article_Type1&call_pageid=971358637177&c=Article&cid=1080256210094)

Gareth Christian was an artistic, intelligent young man with a great sense of humour, excited at the prospect of starting his own snowboarding company. So when the 18-year-old Vancouver resident committed suicide in January, 2002, his friends and family were shocked. Gareth had been prescribed Paxil. (Gareth's father could not accept his son's death and took his own life...)
