20 Things I Wish Vaccine Junkies Would Admit

<https://leviquackenboss.wordpress.com/2015/02/23/20-things-i-wish-vaccine-junkies-would-admit/>

#FirstDoNoHarm

*Toxins, Informed Consent, & Vaccines

Always important to look into things & do your own research. Here's a place to start, but first a question...

Why are so many poisons pushed on us as safe?

I believe "Autism" - a deceptive umbrella term used to distract via misdirection - and myriad other modern day afflictions are exploding because we've been bombarded with all manner of genotoxic, mutagenic, carcinogenic, endocrine disrupting chemicals, neurotoxic heavy metals, oncogenic pathogens, & assorted poisons for generations. Many are cumulative, & will pass onto our progeny.

Environmental Toxicity & Body Burden

<http://goo.gl/F9qeMq>

<http://goo.gl/MKbuEb>

<http://goo.gl/eAqk>

<http://goo.gl/49ScyV>

Gender Benders

<http://goo.gl/qmHA>

Why are our genes suddenly "going bad" in myriad ways?

Harms Way

<http://goo.gl/LNMz1X>

In my lifetime, our exposure to toxic chemicals has risen significantly & GMOs were introduced to our already nutritionally sterilized, artificially flavored, poison & pesticide infused everything.

Food-like

<http://goo.gl/Nb462y>

Additives

<http://goo.gl/6WXIxO>

Synthetic garbage is pushed as healthy, often subsidized. Natural products are censored & outlawed, particularly if KNOWN to have medicinal value.

FDA Censors Nutrition

<http://goo.gl/Etr10p>

<http://goo.gl/36ootb>

Nutrient Freedom

<http://goo.gl/mFVyxL>

Glyphosate isn't safe & is pushed on us in ridiculous amounts. Those who make it & vouch for its safety, are known liars, claiming the same with other poisons they pushed on unsuspecting people (<http://goo.gl/jOv29p>), & hiding safety studies via commercial confidentiality. (<http://goo.gl/DcfwJc>)

It's so pervasive, it's literally being rained down on us. <http://goo.gl/JF52UR>

Parts per trillion - an miniscule amount required to EXPONENTIALLY INCREASE chances of cancer & as well as chelating minerals, etc. (Those surviving "conventional" treatments a while, new cancers will grow more aggressively.)

Pesticide approvals misleading

S. Humphries

<http://goo.gl/fkCzcn>

Fascist government & medical industry have been complicit in fraud on numerous topics all along, while concurrently attempting to discredit & vilify skeptics & dissenters.

Medical Terrorism

<http://goo.gl/nGthn>

<http://goo.gl/Et3N3D>

It often takes the general public decades to catch on & they tend to defend more of the same.

Expert Advice

<http://goo.gl/GGIbuH>

Food Allergies

<http://goo.gl/HQEoOQ>

Today's prescription is tomorrow's class action lawsuit - except for vaccines - which the drug companies were granted immunity from liability on.

*ABSENCE OF ACCOUNTABILITY

<http://goo.gl/EBjhjr>

Vaccine Related Videos, Documentaries, & Audio Clips

<http://goo.gl/9ljBcE>

I find it ironic, that the pro-vaccine fanatics are looking to hold non-vaccinating people legally & financially responsible for the spread of diseases, when those who push vaccines (which can cause myriad issues including death, lifelong disability, autoimmune disorders, & circulating virulent strains of the very diseases they are supposed to protect against) have been unconstitutionally shielded from any accountability or liability for harms done to people by their dangerous products.

Vaccines will tell you right in the inserts that they have not been evaluated for carcinogenic (creates cancer) or mutagenic potential (damages DNA which can cause all sorts of issues including autoimmune disorders & various afflictions currently listed as genetic disorders), or potential to impair pregnancy. They will also list that it is not known whether they can cause fetal harm or affect reproduction capacity. (possibility of hurting growing babies, spontaneous abortions, &/or sterilization)

The lists of disturbing adverse events/reactions, possible side-effects, & even just the omissions where there is a conspicuous lack of research in areas that should not be neglected such as the capacity to give you cancer, damage your genes, harm your babies, or sterilize you speaks volumes - as does the fact that these companies & the governments who endorse them are known not so much for their integrity as their lack of it.

Should you witness your child suffer a reaction, or even die, the healthcare community has been trained to misconstrue the situation, often dismissing the parents, in what can accurately be referred to as "Medical Gaslighting".

If vaccines are so safe, why do those who create & push them need special protections outside of our justice system which undermine people's constitutionally protected rights to hold them liable when they cause harm?

We need to start working to put an end to those legal immunities they enjoy, & start going after the people within our legal systems who are using their political platforms as a means of practicing medicine as they work to mandate medical procedures, removing our rights to bodily integrity & informed consent.

If you don't have the right to refuse, then you have no rights at all.

A Parent's Response to the New York Times Article: Eliminate Vaccine Exemptions

<http://goo.gl/Nxlojm>

"Let's take a close look at package inserts of various drug companies and the vaccines they manufacture. More importantly, let's look at how the pharmaceutical companies manipulate safety results."

<http://goo.gl/R2Vtwv>

For those who assert that vaccines are safe...

PROVE that ANY ingredient in vaccines is SAFE, rather than poisonous when injected.

PROVE that vaccines have ever eradicated a disease, aside from junk science & correlation.

Don't forget that vaccines have been recognized as "Unavoidably Unsafe" & that their manufacturers are legally immune from being sued within the states for harms they may do.

Don't forget to compare each the FDA's & the EPA's listed acceptable "safe limits" of exposure to the various ingredients in vaccines - noting the differences between ingestion vs injection, with the actual amount within the vaccines themselves, to tally up the totals for the cumulative exposure of each, if following the CDC's recommended schedule.

Don't forget that not all ingredients will be listed on the vaccine insert. (Some are withheld as 'proprietary ingredients' or because amounts considered negligible.)

Don't forget that it's acknowledged, they can kill people. Ever wonder how many people die from vaccines a year? Who knows, because last I looked, for some reason -(\$\$\$)- much like circumcision they dance around listing it as a cause of death.

Just because something has been entrenched in dogma for decades, doesn't mean it has any inherent merit. Many diseases that were epidemic at the same time as so called "vaccine preventable" diseases, declined on their own - without any vaccinations for them being introduced. (Last I recall, the official story that the Earth was 'flat', was being told for a LOOOOOOONG time, too.)

How on earth did our species survive for so many thousands of years before we started using poisons, disease, & genital mutilation as substitutes for our natural immune systems?

We didn't all die. Hell, why bother having doctors wash their hands before surgery or delivering infants if bypassing the body's defenses & introducing pathogens via unnatural means is such a good idea?

Particularly in light of the necessity of health freedom, the skepticism, concern, & questions of so many, the rash of inexplicable ailments plaguing our younger generations:

Why is it not MANDATORY to report ANY acute adverse events/reactions at least within the first month after vaccinating, to be scrutinized & compared against the known effects of each ingredient in vaccines, & kept closely monitored, rather than a voluntary system that not only shields manufacturers, but strongly discourages healthcare practitioners from disclosure of information that goes against entrenched establishment's vaccine dogma?

I'd love to just be able to shut up, mind my own business, & do my own thing, but vaccine zealots are always actively working to remove our rights to decline.

For those who say, just keep your kids at home & homeschool - homeschooling has been under attack, as well.

Case in point - the German refugees who fled based on being persecuted for homeschooling - that Obama was going to send back to Germany, because "homeschooling is not protected by the Constitution". Go figure.

Doesn't seem like much of anything is safe, anymore.

I've had vaccines forced on me, & my children have had vaccines forced on them, over my objections.

Today's CDC recommended vaccine schedule pushes a MUCH greater number of vaccines today,

than it did when we were kids.

Unless you have gotten ALL of those recommended vaccines complete with regular boosters, you aren't up to date, the efficacy of those old vaccines has "expired", and by pro-vaccine specs - you're every bit as much of a "threat" as an unvaccinated child.

If every adult you knew, started getting "caught up" on their boosters for all the recommended vaccines, you can bet, it'd start getting ~REAL~ noticeable.

Dr. Paul Offit is a vaccine proponent, who says babies can handle as much as 10k vaccines at once & be fine. Heard he later upped that amount, though haven't pursued further looking into that.

By that assertion, adults ~SHOULD~ be able to get an indeterminate amount of vaccines safely.

If you really trust it, then YOU & EVERYONE YOU KNOW SHOULD BE REGULARLY GETTING BOOSTERS FOR EVERYTHING YOU USED TO GET, AS WELL AS EVERYTHING CURRENTLY RECOMMENDED BY THE CDC SCHEDULE.

If you trust it, then encourage it among vaccine proponents & you'll start rapidly losing numbers to adverse events/reactions & the vaccine skeptics movement.

As for jokes about vaccines against anti-vaxxers, I bet big pharma would try to sell you one...

"New Anti-Conspiracy-Weirdo Vaccine. Completely nerfs one's capacity to question the official narrative." (Lining up for lobotomies was once in vogue, too.)

In modern times, we aren't so barbaric. We prefer our lobotomies to be chemically induced.

You can not prove VACCINES saved ANY lives, and diseases that vaccine proponents claim to have eradicated, etc, were largely dying down due to:

- *) natural cycle of seasonal illnesses
- *) improved sanitation practices
- *) access to clean water
- *) improved nutrition & food storage

All of those are KNOWN to be highly relevant factors in the incidence of disease.

Any claim that vaccines have wiped out any disease is pure correlation, which ignored EVERY relevant factor besides vaccines that are far more likely to have contributed to an increased lifespan, including, but not limited to doctors FINALLY getting over the DOGMA that washing hands properly between visits to the morgue and the maternity ward was beneath them. (That made a major difference!)

Nutrition, access to clean water, sanitation, & number of people having to closely associate with each other are all highly relevant.

Interestingly, our nutrition & sanitation have been under assault via GMO monocrop industrial agriculture, factory farmed animals drugged with antibiotics rather than addressing institutionalized lack of sanitation, rampant industrial pollution, chemical contaminants, metal contaminants, organic contaminants, pasteurization &/or irradiation of everything, censorship of

nutrient benefits via FDA, cracking down on urban farmers, crop sharing, etc .

We've also crammed so many people into close quarters within the city - we're practically begging for epidemics.

Our water has been actively bombarded with shit (both figuratively & literally) that would make your average, blissfully ignorant Joe, want to barf his f*cking soul out to realize what's been allowed & deliberately added into the water we drink & bathe in. (See blending & fracking.)

Our government has been known to employ tactics of war - including biological, chemical, & psychological warfare - on their own people. I see no reason to believe they haven't been proactively poisoning us, given what I've learned of their past behaviors, & comparing it with our current issues.

"Blending"

<http://irregulartimes.com/drinkshit.html>

<http://www.dailykos.com/.../-Blending-Shit-into-Your...>

<http://beta.slashdot.org/story/204527>

Fracking

<http://scholar.google.com/scholar...>

Isn't it amazing how scientists dependent on the current establishment for their livelihoods praise the correlation of diseases that dwindled due to some suspiciously convenient timing in the introduction of their vaccines & radical changes in diagnostics criteria, but cry, "Correlation does not equal causation!", when a kid becomes neurologically damaged, chronically ill, comes down with an autoimmune disease, is disabled, &/or drops dead within close proximity of being injected with ingredients KNOWN to cause their various symptoms?

Oh, and, "Correlation means nothing when it comes to improved nutrition, sanitation, & water as factors for the decline in those diseases", either.

"Vaccines are our salvation. Praise them." Dissent is heresy.

If you vaccinate you're allowing the injection of poison. Not "at risk." Straight up, poisoning.

Dose them up, hope for the best, & tell yourself it was "for the greater good" if it doesn't work out so well.

Very generous to volunteer their well-being for the greater good, but I don't think making a sacrifice for your ideals is so virtuous when the sacrifice is being forced on someone who can not/has not expressly given informed consent. <http://goo.gl/WuPZPx>

I would rather not sacrifice my children to the gods of entrenched fascist & scientific dogma.

*5 Reasons to rethink Vaccination

5)History shows brazen conflicts of interests, questionable motives, cronyism, corruption,

corporate science, steady attempts to erode our rights to informed consent, oppressive/deceptive/divisive/dismissive fearmongering tactics, disregard for the well-being of others, coupled with a general lack of ethics among those who create, promote, & try to force vaccines, particularly on minorities &/or poor people. Putting your faith in untrustworthy liars seems like an act of insanity.

4)The inserts will flat out tell you they have not been evaluated for carcinogenicity (cancer causing potential), mutagenicity (potential to damage genes/DNA), impairment of fertility in general (harms could do to ability to have kids), or for use in pregnant women (what harm could cause pregnant women &/or their growing babies).

3)Potential for lethal or debilitating lifelong consequences vs questionable/limited efficacy at protecting against diseases that generally present as asymptomatic or mild in the majority of people who get them.

2)Every ingredient in vaccines is toxic when injected & can actually exponentially enhance each other's toxicity

1)Because you love your child & would never want to deliberately expose them to dangerous, possibly lethal, controversial procedures involving toxic substances you hadn't personally exerted great effort into critically evaluating & thoroughly researching from both sides of the arguments.

Silencing "The Debate"
