

The Cost of Infectious Disease Prevention: The ProphylAxis of Evil

By Eileen Dannemann

Why do liberty-seeking voters have such high regard for liberty and freedom of speech yet they vandalize, steal and deface the mini-Trump billboards that are popping up around town endorsing Donald Trump for president? Trump is the one candidate that has been very vocal about the vaccine controversy and the Autism epidemic as documented in the movie VAXXED, From Cover Up to Catastrophe" *

Cancer is the leading cause of children's death in the United States! The US has the highest vaccine rates and yet concomitantly has one of the highest infant mortality rates of all the developed countries. Physiological and neurological injury due to the overly aggressive CDC vaccine program is consistently misdiagnosed as mental illness, ADHD, Autism, bipolar etc. Statistical data from Citizen Commission on Human Rights (www.CCHRInt.org) shows that in infancy (0-1 year olds), 278,151 babies are on anti-anxiety drugs (such as Xanax, Klonopin, and Ativan); antidepressants (such as Prozac, Zoloft, and Paxil); antipsychotics (such as Risperdal, Seroquel, and Zyprexa); and ADHD drugs (such as Ritalin, Adderall, and Concerta). (1)

In the 2-3 year old toddler category 368,858.00 are on anti-anxiety drugs, antidepressants, and anti psychotic prescriptions. In the 0-5 year olds children are currently prescribed 1,080,168.00 psychiatric drugs. There are 4,130,340.00 psychiatric drugs prescribed to 6-12 year olds. In the 13-17 year old category 3,617,593.00 are taking psychiatric drugs.

What is happening to human progeny? How does it happen that our infants and children are dying off early from cancer, have ADHD, bipolar disorder, asthma, eczema, allergies, obesity, Autism, learning disabilities or are diagnosed as mentally ill before reaching the age of 6?

How did "at risk" children, (endangered supposedly by the unvaccinated) get their health problems in the first place? Could it be the 49 vaccine doses containing, formaldehyde, phenol, aluminum, ethanol, dog kidney cells, insect cells, bovine or calf serum and multiple flu shots containing mercury (2), all before the age of six?

Parents who choose not to vaccinate have researched the science while also recognizing the personal experiences of fellow parents who testify that their children regressed into Autism after being vaccinated. Why did our federal government give vaccine providers total immunity from lawsuits in cases alleging injury caused by their vaccines if vaccines are so safe and effective?

If vaccines work why was the vast majority of measles cases at Disneyland previously of persons vaccinated or why are all 40 students in the recent mumps outbreak Harvard University fully vaccinated? (3)

Bernie Sanders says vaccinate everyone for the sake of “the greater good”(a fascist/ philosophy - the collective over the individual). Clinton flippantly says, “the sky is blue, the earth is round, and vaccines are safe”. On the other hand, the Trump Team, Trump, Carson and Christie have voiced their concerns about vaccine safety and parental rights. Under a Trump presidency Carson as HHS secretary and Attorney Chris Christie as US Attorney General are poised, on behalf of all parents & their children, vaccinated and unvaccinated, to investigate vaccine safety and alleged CDC corruption.
